Polyolefin Coated Steel Chain Link Fence Fabric ASTM F 668 Class 2b,

Federal specification RR-F-191 Type IV, Class B; AASHTO M-181 Type IV, Class B

1. PRODUCT NAME

MaxFuse2b Polyolefin Coated Chain Link Fence Fabric.

2. MANUFACTURER

Southwestern Wire, Inc. 3505 N. Interstate Dr. Norman, OK 73070 1-800-348-9473 1-405-447-6900

FAX: 405-447-2830

Email: Sales@southwesternwire.com

3. PRODUCT DESCRIPTION Basic Use:

Polyolefin Coated chain link fence fabric is suitable for industrial, commercial, and institutional applications where the additional corrosion resistance and or the enhanced appearance of Polyolefin coated wire is desired. Polyolefin Coated fence fabric is often required by local, state and federal government specifications for use in prison, road, dock, airport, housing, forestry and military applications.

Composition and Materials:

The core wire is cold drawn from commercial grade medium/low carbon steel rod to the appropriate diameter. The wire is then galvanized (zinc coated) to the appropriate coating weight per diameter as specified in ASTM F668. The finished core wire has a minimum breaking strength as specified for the diameter in ASTM F668.

For a Class 2b Polyolefin a minimum 0.006 in. / maximum 0.015 in. is extruded over the core wire. No further adherent is needs to be applied to the core wire before extrusion to further adhere the Polyolefin to the core wire it has a strong adherance by itself. These finished wires shall conform to the requirements of ASTM F668 with reference to adhesion, aging, malleability and color.

The wire is then woven into Chain Link Fence fabric to the mesh size, height, and selvage as required by the end user.

Standards:

ASTM B 6 Slab Zinc ASTM F567 Installation of Chain Link

Fence

ASTM F668 Standard Specification for Polyvinyl Chloride

(PVC) and Other Organic Polymer-Coated Steel Chain Link Fence Fabric, Class 2b

Federal specification RR-F-191K/1D
Fencing, Wire and Post Metal
(Chain-Link Fence Fabric), Type IV, Class

American Association of State Highway Transportation Officials (AASHTO) –181 Chain Link Fence, Type IV, Class B

4. TECHNICAL DATA

General:

The manufacturer, if requested, will supply samples and certification that all materials furnished fully comply with the appropriate specifications.

Chain Link Fence Fabric:

The base metal of the chain link fence fabric is composed of commercial quality, mediumcarbon galvanized (zinc coated) steel wire. With Class 2b, the polyolefin coating is continuously applied over the galvanized wire by the extrusion process. Polyolefin uses no additional application of an adherent to bind to the steel wire, it has a stronger adhesion to the steel wire surface. The extrusion process ensures a dense and impervious coating free of voids, as well as a smooth and lustrous surfaces appearance. Polyolefin coating thickness, galvanized coating weight, and wire tensile strength conform to ASTM F668, Class 2b, Federal specification RR-F-191 Type IV, Class B and AASHTO M-181 Type IV, Class B, as shown in **Table 2**. The wire is polymer coated before weaving and is free and flexible at all joints. Unless otherwise specified, fabric woven in 2 in. (50mm) mesh, under 72" (1,830 mm) in height, is knuckled at both selvages; fabric 72" (1,830 mm) high and over is knuckled at one selvage and twisted at the other. All fabrics woven into meshes under 2 in. (50 mm) have both selvages knuckled. See Table 1.

Wire Coating:

The Polyolefin coated wire from which the fabric is woven will demonstrate the ability to conform to all requirements and test in ASTM F668. The Polyolefin coating resists attack from prolonged exposure to dilute solutions of most common mineral acids,

seawater, and dilute solutions of most salts and alkali. **See Table 3.**

ASTM Color System:

Standard colors conform to ASTM F934 and include:

	Dark				
	Green	Brown	Black		
L	28.61	27.76	22.30		
A	-12.59	3.37	-0.09		
В	1.95	4.28	-0.85		

Other colors are available by special order. **Sizes:**

Polyolefin coated fabric is available in mesh sizes from 3/8 inch to 2 inches (10 mm to 50 mm), and in heights for 36 inches to 240 inches (910 mm to 6,100 mm).

5. INSTALLATION

Install chain link fence fabric in accordance with ASTM Practice 567. Handle all Polyolefin coated material with care. If the Polyolefin coating is damaged during installation, contractor must replace or repair the material at own expense.

6. AVAILABILITY AND COST Availability:

Polyolefin coated steel chain link fence fabric is available for shipment throughout the United States and worldwide.

Cost:

Material costs may vary depending on specific requirements. Costs may be obtained by calling Southwestern Wire, Inc. or one of their stocking dealers.

7. WARRANTY

Polyolefin coated steel chain link fence fabric (Class 2b) is warranted for 15 years against failure due to rust or corrosion.

8. MAINTENANCE

Periodic inspection is recommended but no routine maintenance is required.

9. TECHINICAL SERVICES

Technical services are available at Southwestern Wire, Inc. by calling 1-800-348-9473.
